Wool, America’s Premium Fiber, is...

American wool...a renewable, natural fiber
Biodegradable...eco-friendly product
Color fast...retains its deep, rich color without fading
Drapes beautifully...sturdy for lasting value
Durable...resists snagging and pilling
Easy care...keeps from soiling
Flame resistant...naturally defends against fire
Moisture absorbing...wicks and moves moisture away from the body to be evaporated
Multi-season...insulates and breathes for comfort
Odor reducing...bacteria not attracted to fiber
Resilient...retains shape, resists wrinkling and stretches with the wearer
Sustainable...offers a ‘green’ fabric option
Water repellant...hydrophobic surface repels liquid

Spot Removal for Wool Fabrics

Alcohol or food: Place towel under area. Gently rub carbonated water toward center of the spot.

Blood: Pat with a damp sponge to remove excess. Then dab very gently with undiluted vinegar followed by cold water.

Butter and grease: Gently sponge with dry-cleaning fluid.

Chewing gum: Scrape off excess gum then sponge with dry-cleaning fluid.

Chocolate: Sponge with cold soapy water.

Coffee or tea: Sponge with glycerin. If none available, use cold water.

Egg: Scrape off excess then sponge with cold soapy water.

Grass: Soap very carefully using a mild bar soap or flakes, or dab gently with a cloth soaked in methylated spirits.

Ink: Immerse in cold water.

Lipstick: Can often be removed by rubbing white bread over stain with a firm gentle motion.

Make-up or shoe polish: Rub gently with a cloth soaked in dry-cleaning fluid. Rinse with mild soapy water.

Motor oil or tar: Sponge with dry-cleaning fluid.

Mud: Allow to dry and then brush off excess mud. Sponge from back with cold soapy water.

Red wine: Immerse in cold water.
